

Back-end Developer Job Description

toorbee is a travel and tourism international company with offices in Greece and abroad offering a wide range of services through its on-line B2B transaction system. **toorbee** intends to fully develop it to accommodate its multiple business locations. This transaction system is able to create and process bookings, manage the company's offerings and inventory/trade flow as well as multi-location requests; new requirements lead to further development, though.

Responsibilities:

- Work with a team of developers and contractors to further develop this web based system;
- Development products should run without flaws on major browsers, tablets and smartphones.

Requirements:

- At least 2 years of proven working experience programming web platforms, services, sites web applications and mobile applications;
- Proven experience in the following: PHP(OOP and Functional programming experience) and Sql(mySql/MariaDb/Percona).
- Good knowledge of one or all of:
 - APIs, JSON/XML, REST/SOAP
 - GIT (or similar)
 - PHP Composer(packages, configurations), Frameworks(Laravel, Lumen or similar)
 - Non-Relational Databases is a plus (MongoDb, CouchDb etc.)

Qualification:

- Preferred graduates in computer science, computer engineering and management information system majors with knowledge and skill of developing a web platform;
- Post-graduate degrees are not required but they will be considered a plus;
- Self-discipline in order to finish work on a timely basis.

Code position: BEWDO118, contact e-mail: careers@toorbee.com
