

Java Web Developer Job Description

toorbee is a travel and tourism international company with offices in Greece and abroad offering a wide range of services through its on-line B2B transaction system. **toorbee** intends to fully develop it to accommodate its multiple business locations. This transaction system is able to create and process bookings, manage the company's offerings and inventory/trade flow as well as multi-location requests; new requirements lead to further development, though.

Responsibilities:

- Work together with company staff to develop business transaction module and flow;
- Work as a team to develop this web based transaction system;
- Work together with our team to run this website on the development site.

Requirements:

- Knowledge of J2EE and Java web frameworks, JAX-WS/RS, and XML/JSON is a must;
- Additional knowledge of HTML, CSS or Javascript is preferred;
- General knowledge about web design and systems architecture should be apparent;
- Code must pass basic requirements for running on devices like tablets and smartphones;

Qualification:

- Preferred graduates in computer science, computer engineering and management information system majors with knowledge and skill of developing a website;
- Good communication skill and willingness to work together with other people;
- Self-discipline in order to finish work on a timely basis.

Compensation:

- If traveling is needed, company will compensate for luncheon and trip expenses.
