

## QA Engineer, Senior Level, Job Description

**toorbee** is a travel and tourism international company with offices in Greece and abroad offering a wide range of services through its on-line B2B transaction system. **toorbee** intends to fully develop it to accommodate its multiple business locations. This transaction system is able to create and process bookings, manage the company's offerings and inventory/trade flow as well as multi-location requests; new requirements lead to further development, though.

### Responsibilities:

- Be able to follow written functional specifications on the final software products;
- Work together with software developers to verify quality of deliverable in different platforms;
- Work with the product department to prepare test scenarios for future implementations;
- Work with QA team improving the automated and manual test cases as the product matures.

### Requirements:

- Minimum 5 years of working experience in relative positions;
- Experience with QA automation tools, e.g. Selenium, Cucumber, Katalon or Postman;
- Experience with Bug reporting or similar tools, e.g. JIRA;
- Good knowledge of testing methodologies;
- Be able to think outside the box with logical and analytical thinking;
- Fluency in English language. Any additional language knowledge will be considered;

### Qualification:

- Preferred graduates in computer science or computer engineering but any other Faculty can apply;
- Good communication skill and willingness to work together with other people;
- Self-discipline in order to finish work on a timely basis.
